

Measuring Occupancy Patterns

December 11, 2024 Update (Week 49)

2024 Weekly Report

Purpose

- The Measuring Occupancy Patterns report was created to help tourism industry understand their weekly behaviour in occupancy.
- The weekly STR report provides up-to-date insights into the tourism industry, helping destinations strategically plan how to attract and engage visitors.
- This report focuses on the regions of **British Columbia**.

STR Methodology

- On a daily, weekly and monthly basis, STR processes performance data from hotels all across BC and the world. This data is submitted straight from the source: chain headquarters, management companies, owners and directly from independent hotels. The data used to understand the BC tourism regions' performance compared to BC as a whole and to each other.
- STR delivers confidential data on hotel Occupancy, Average Daily Rate (ADR) and Revenue per Available Room (RevPar), for markets such as the tourism regions of BC and for individual companies who participate.

- **Participate in the STR “STAR” report: Submit your data and receive free reports benchmarking your performance against your market. Sign up today for free here: <https://surveys.str.com/s3/Hotel-Enrollment-Form>**

Glossary

- **Occupancy:** Calculated by the number of occupied rooms divided by the number of available rooms that physically exist in a short-term rental.
- **Average Daily Rate (ADR):** Represents the average rental income per paid occupied room in a given time period; however, ADR itself cannot be used to measure a short-term rental performance.
- **Revenue per Available Room (RevPAR):** Calculated by multiplying a short-term rental ADR by its Occupancy rate, an increase in RevPAR most likely indicates an improvement in Occupancy rate and can be used to measure a short-term rental performance.

Notes:

- The baseline of comparison is 2023, with percentages above 0% indicating higher rates of visitation in 2024 than 2023, and percentages below 0% indicating lower rates of visitation in 2024 than 2023.
- Weekly comparisons may not reflect the exact same date between the two comparison years. Therefore holiday weekends may fall on different weeks and result in higher peaks in the current year. Please refer to the Appendix for date conversions. Ex. Good Friday was April 7 in 2023 (week of April 3) and March in 2024 (week of March 25), this created a leap/fall when comparing year over year.
